

Polen Capital Announces Closing of Second Lien Credit Facility for Material Sciences Corporation

Boca Raton, FL – March 19, 2025 - Polen Capital (“Polen”) is pleased to announce the closing of a senior secured second lien credit facility for Material Sciences Corporation (“MSC”), a leading designer and manufacturer of advanced materials and specialty metals processing based in Canton, Michigan. The facility was used to refinance existing indebtedness and provide growth capital for the business.

MSC, through its network of six facilities throughout the United States, is a processor and manufacturer of specialty metals and advanced materials serving the transportation, building products, packaging, and consumer goods industries. The company’s products provide light weighting solutions, corrosion protection, NVH (Noise Vibration Harshness) treatment, and aesthetic finishes for a diversified customer base. Funds and accounts managed by Polen Capital were positioned to provide the financing because of Polen’s long-standing relationship with the company and its management team, coupled with Polen’s deep experience investing in the metals industry.

About Polen Capital

Polen Capital is a global investment firm with extensive credit capabilities provided by its wholly-owned subsidiary, Polen Capital Credit. Since 2011, funds and accounts managed by Polen Capital have provided over \$6.6 billion in direct transactions to public and private companies, investing across the capital structure, including senior loans, subordinated debt, and equity. Polen Capital targets financings that typically range from \$10 million to \$100 million to public and privately-owned companies across a variety of sectors.
