A. Portfolio Valuation:

The Polen Growth & Income Fund's (the "Fund") net asset value ("NAV") is calculated once daily at the close of regular trading hours on the New York Stock Exchange ("NYSE") (typically 4:00 p.m. Eastern time) on each day the NYSE is open. Securities held by the Fund are valued using the closing price or the last sale price on a national securities exchange or the National Association of Securities Dealers Automatic Quotation System ("NASDAQ") market system where they are primarily traded. Equity securities traded in the over-the-counter market are valued at their closing prices. If there were no transactions on that day, securities traded principally on an exchange or on NASDAQ will be valued at the mean of the last bid and ask prices prior to the market close. Fixed income securities having a remaining maturity of greater than 60 days are valued using an independent pricing service. Fixed income securities having a remaining maturity of 60 days or less are generally valued at amortized cost, provided such amount approximates fair value. Fixed income securities are valued on the basis of broker quotations or valuations provided by a pricing service, which utilizes information with respect to recent sales, market transactions in comparable securities, quotations from dealers, and various relationships between securities in determining value. Valuations developed through pricing techniques may materially vary from the actual amounts realized upon sale of the securities. Investments in other open-end investment companies are valued based on the NAV of the investment companies (which may use fair value pricing as discussed in their prospectuses). Securities that do not have a readily available current market value are valued in good faith by Polen Capital Management, LLC (the "Adviser") as "valuation designee" under the oversight of the Trust's Board of Trustees ("Board of Trustees"). Relying on prices supplied by pricing services or dealers or using fair valuation may result in values that are higher or lower than the values used by other investment companies and investors to price the same investments. The Adviser has adopted written policies and procedures for valuing securities and other assets in circumstances where market quotes are not readily available. In the event that market quotes are not readily available, and the security or asset cannot be valued pursuant to one of the valuation methods, the value of the security or asset will be determined in good faith by the Adviser pursuant to its policies and procedures. On a quarterly basis, the Adviser's fair valuation determinations will be reviewed by the Trust's Board of Trustees.

The Fund has a fundamental policy with respect to industry concentration that it will not invest 25% or more of the value of the Fund's assets in securities of issuers in any one industry. Since inception the Fund has utilized BICS at the sub-industry level for defining industries for purposes of monitoring compliance with its industry concentration policy. However, at times, the Fund may utilize other industry classification systems such as Morningstar Global Equity Classification Structure ("MGECS") or Global Industry Classification Standard ("GICS"), as applicable, for purposes other than compliance monitoring.

Fair Value Measurements — The inputs and valuation techniques used to measure fair value of the Fund's investments are summarized into three levels as described in the hierarchy below:

- Level 1 quoted prices in active markets for identical securities;
- Level 2 other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.); and
- Level 3 significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments).

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. Transfers in and out are recognized at the value at the end of the period.

Significant events (such as movement in the U.S. securities market, or other regional and local developments) may occur between the time that foreign markets close (where the security is principally traded) and the time that the Fund calculates its NAV (generally, the close of the NYSE) which may impact the value of securities traded in these foreign markets. As a result, the Fund fair values foreign securities using an independent pricing service which considers the correlation of the trading patterns of the foreign security to the intraday trading in the U.S. markets for investments such as American Depositary Receipts, financial futures, exchange traded funds and certain indexes as well as prices for similar securities. Such fair valuations are categorized as Level 2 in the hierarchy.

Notes to the Quarterly Portfolio of Investments (Continued) January 31, 2025 (Unaudited)

Securities listed on a non-U.S. exchange are generally fair valued daily by an independent fair value pricing service approved by the Trust's Board of Trustees and categorized as Level 2 investments within the hierarchy. The fair valuations for these securities may not be the same as quoted or published prices of the securities on their primary markets. Securities for which daily fair value prices from the independent fair value pricing service are not available are generally valued at the last quoted sale price at the close of an exchange on which the security is traded and categorized as Level 1 investments within the hierarchy. Values of foreign securities, currencies, and other assets and liabilities denominated in foreign currencies are translated into U.S. dollars at the exchange rate of said currencies against the U.S. dollar, as of valuation time, as provided by an independent pricing service approved by the Board of Trustees.

The valuations for fixed income securities, including corporate bonds and floating rate senior loans ("Senior Loans"), are typically the prices supplied by independent third-party pricing services, which may use market prices or broker/dealer quotations or a variety of valuation techniques and methodologies. The independent third-party pricing services use inputs that are observable such as issuer details, interest rates, yield curves, prepayment speeds, credit risks/spreads, default rates and quoted prices for similar securities. Senior Loans are fair valued based on a quoted price received from a single broker-dealer or an average of quoted prices received from multiple broker-dealers or valued relative to other benchmark securities when broker-dealer quotes are unavailable. To the extent that these inputs are observable, the fair value of fixed income securities and Senior Loans would be categorized as Level 2; otherwise the fair values would be categorized as Level 3.

The following is a summary of the inputs used, as of January 31, 2025, in valuing the Fund's investments carried at fair value:

	Total Value at 01/31/25		Level 1 Quoted Price		Level 2 Other Significant Observable Inputs		Level 3 Significant Unobservable Inputs	
Assets								
Common Stocks

Please refer to Portfolio of Investments for further details on portfolio holdings.

At the end of each quarter, management evaluates the classification of Levels 1, 2 and 3 assets and liabilities. Various factors are considered, such as changes in liquidity from the prior reporting period; whether or not a broker is willing to execute at the quoted price; the depth and consistency of prices from third-party pricing services; and the existence of contemporaneous, observable trades in the market. Additionally, management evaluates the classification of Level 1 and Level 2 assets and liabilities on a quarterly basis for changes in listings or delistings on national exchanges.

Notes to the Quarterly Portfolio of Investments (Concluded) January 31, 2025 (Unaudited)

Due to the inherent uncertainty of determining the fair value of investments that do not have a readily available market value, the fair value of the Fund's investments may fluctuate from period to period. Additionally, the fair value of investments may differ significantly from the values that would have been used had a ready market existed for such investments and may differ materially from the values the Fund may ultimately realize. Further, such investments may be subject to legal and other restrictions on resale or otherwise less liquid than publicly traded securities.

For fair valuations using significant unobservable inputs, U.S. generally accepted accounting principles require the Fund to present a reconciliation of the beginning to ending balances for reported market values that present changes attributable to total realized and unrealized gains or losses, purchase and sales, and transfers in and out of Level 3 during the period. A reconciliation of Level 3 investments is presented only when the Fund has an amount of Level 3 investments at the end of the reporting period that was meaningful in relation to net assets. The amounts and reasons for all transfers in and out of Level 3 are disclosed when the Fund had an amount of transfers during the reporting period that was meaningful in relation to net assets as of the end of the reporting period.

For the period ended January 31, 2025, there were no transfers in or out of Level 3.

For more information with regard to significant accounting policies, see the Fund's most recent semi-annual or annual report filed with the Securities and Exchange Commission.
