This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

## Polen Capital U.S. Small Company Growth Fund (the "Fund") a sub-fund of Polen Capital Investment Funds plc (the "Company")

### US Dollar Class (Retail) (ISIN IE00BYWHBB40) (the "Share Class")

#### Objectives and Investment Policy

The Fund's objective is to achieve long term growth of capital.

The Fund will invest primarily in a focused portfolio of high quality common stocks of small companies (market capitalisations within the range of the market capitalizations of companies in the Russell 2000 Index and the S&P Small Cap 600 Index on a rolling three-year basis at time of purchase) which are listed or traded on recognised exchanges in the United States of America.

The Fund may also invest in American Depositary Receipts where deemed appropriate by the Investment Manager in order to achieve the investment objective of the Fund.

These stocks are selected by the Investment Manager on the basis that they operate with a sustainable underlying competitive advantage among companies in their respective industries or sectors. For example, the Investment Manager will select securities which it feels have consistent and sustainable high returns on capital, vibrant earnings growth, robust free cash flow generation, strong balance sheets and competent and shareholder-oriented management teams.

The Fund may also hold and maintain ancillary liquid assets, including cash and cash equivalents (such as certificates of deposit) and money market instruments (such as commercial paper, bankers acceptance and other short-term debt securities).

The Fund may use a limited number of simple derivative instruments for hedging

purposes (such as currency swaps and currency forwards). It is not intended that the Fund will be leveraged as a result of its use of derivatives.

The Fund is considered to be actively managed in reference to the Russell 2000 Growth Index and the S&P Small Cap 600 Index (the "Benchmarks") by virtue of the fact that it uses each of the Benchmarks to define the characteristics of the securities held by the Fund. Certain of the Fund's securities may be components of and may have similar weightings to the Benchmarks. However, the Fund may be wholly invested in securities which are not constituents of the Benchmarks. The Fund may also use the Russell 2000 Growth Index for performance comparison purposes, however it is not used as a performance target.

The Shares that you will hold in the Fund are accumulating Shares. This means that income from the Fund's investments will be included in the value of your shares rather than being paid to you as a dividend.

You may sell shares in the Fund by submitting an application to the Fund's Administrator before 2 p.m. (Irish time) on any business day and/or such other day or days as may be determined by the Directors of the Company.

Recommendation: this Fund may not be appropriate for investors who do not have a long-term investment horizon.

**For further information please see the "Investment Objective" and "Investment Policy" sections of the Prospectus and the Fund Supplement.**

#### Risk and Reward Profile

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- The risk category was calculated using historical performance data and it may not be a reliable indicator of the Fund's future risk profile.
- The risk category shown is not guaranteed and may shift over time.
- The lowest category does not mean a 'risk free' investment.
- The value of shares and the income from them can rise or fall and, accordingly, an investor may not get back the full amount invested.

Funds in category 7 have in the past shown high volatility. With a fund of category

7, you have a high risk of losing money but your chance for gains is also high.

The Fund is also subject to risks which are not included in the calculation of the risk-reward indicator associated with the following:

**Operational risk:** management, business or administration processes, including those to do with the safekeeping of assets, may fail, leading to losses.

**Counterparty risk:** a counterparty may fail to deliver the proceeds related to the sale of securities by the Fund or in safekeeping of the securities purchased by the Fund.

**Securities risk:** some of the markets or exchanges on which the Fund may invest may go up and down, and value of your investment may not increase.

**A more detailed description of the risk factors that apply to the Fund is set out in the "Risk Factors" section of the Prospectus.**
